Vaibhav Karad

DevOps Engineer | GCP, Jenkins, Docker, K8S | Creator of
karadhub.dev | Tech Blogger, Speaker
Navi Mumbai, Maharashtra, India

Summary

I'm all about building and optimizing modern cloud infrastructure. My
focus is on making things more efficient and scalable by leveraging a
few key technologies:

Kubernetes, Jenkins, and Terraform: I use these to deploy
infrastructure, automate everything from the ground up, and drive
robust CI/CD pipelines.

☁# Multi-Cloud & DevSecOps: I'm passionate about integrating
these strategies to build secure, reliable, and high-performing
systems.

When I'm not hands-on with the tech, I'm sharing what I've learned
whether it's mentoring a junior engineer, speaking at an event, or
writing content. This blend of deep technical expertise and strong
communication skills allows me to not only build great systems but
also help organizations truly innovate with cloud technology.
